Education

- **K R Managlam University** — Gurgaon, Haryana
  MCA — *2023 – 2025*
- **Institute of Technology and Science, Mohan Nagar** — Ghaziabad, Uttar Pradesh
  BCA — *2020 – 2023*

Experience

- **PC Solutions Pvt. Ltd.** — Okhla, Delhi
  Jr. Software Engineer — *Oct 2025 - Present*
  - **Multi-Cloud Self-Service Password Reset (SSPR) Portal**
    - Built an enterprise identity management solution enabling cross-platform self-service password resets and credential lifecycle management for Active Directory, Azure AD, GCP, and AWS IAM.
    - Engineered a multi-tenant Control Panel to govern organizational licenses, alongside an admin dashboard featuring role-based access control (RBAC), audit logging, and anomaly detection.
    - Integrated a secure Biometric authentication system featuring Face Recognition with 95%+ accuracy using the Google MediaPipe library.
    - Developed an NLP-powered agentic chatbot (Node-NLP) for contextual guidance and automated multi-step troubleshooting, significantly reducing helpdesk ticket volume.
    - **Tech Stack:** React 19, Tailwind CSS, Node.js, Express, Node-NLP, Google MediaPipe, DistilBERT, MySQL, Active Directory/LDAP, JWT, TOTP.
  - **ENT-GPT – Enterprise On-Prem AI Platform**
    - Designed and deployed an enterprise AI platform on edge hardware, optimizing Small Language Models (SLMs) to increase capacity from 10 to 50+ concurrent users (∼15 tokens/sec).
    - Built a secure Retrieval-Augmented Generation (RAG) pipeline for semantic document search across locally hosted and paid LLMs.
    - Developed AI Sales Agents integrated with CRMs to automate prospect research, generate personalized outreach emails, and manage context-aware follow-up campaigns.
    - **Tech Stack:** Python, Fine-tuned SLMs/LLMs, RAG, Vector Search, Docker, Linux, React, Node.js, CRM Integrations.

Projects

- **AI Content Engine (Llama-2)**
  - Engineered an end-to-end automated blogging platform using **Llama-2**, reducing initial draft generation time by approximately 80%.
  - Designed a user-friendly interface with **Streamlit**, allowing non-technical marketers to generate long-form content via simple keyword inputs.
  - Developed a Python-based content automation tool using **Llama-2** and **LangChain** to streamline digital marketing workflows.
  - **Tech Stack:** Python, LangChain, Streamlit.

Skills

- **FrontEnd**: HTML, CSS, Tailwind CSS, React
- **BackEnd**: Node.js, Express.js, Python
- **Database**: MySQL, MongoDB
- **General**: Prompt Engineering

Achievements

- **Gold Medal Award** — Received a Gold Medal for outstanding performance in the Diploma in Data Science Using Python under the Microsoft Partner Program, conducted by Shape My Skills Pvt. Ltd. at ITS Mohan Nagar during the Bachelor of Computer Applications (BCA).
